I.T. Consulting

Because of our superior understanding of how a Well-Managed data center should operate, TDXNet has developed core competencies in the areas of design, deployment, storage, project management, and virtualization while incorporating Exceptional Customer Service. In addition we follow best practice in IT consulting.

Our full range of services includes; on-call support, outsourcing, Hardware & Software support, upgrades and licensing. TDXNet addresses each client's unique needs and requirements to enable the best possible strategic business continuity plan that aligns IT with business structure.

TDXNet is partnered with industry leading technology companies. This permits the company to exercise flexibility, competitiveness, and the availability with respect to meeting all your mission critical IT needs.

Digitization Services

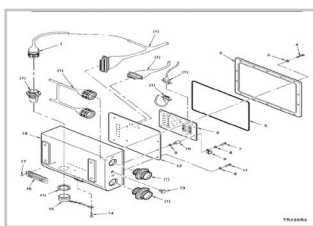

Our experience in document and scanning services range from complex technical manual conversion to records conversion. Our team has converted flat graphic into rasterized, vector-based graphics, breathing new life into older graphics and documents. This transformation takes costly content and converts it into a modern, useful, electronic format.

Graphics Conversion

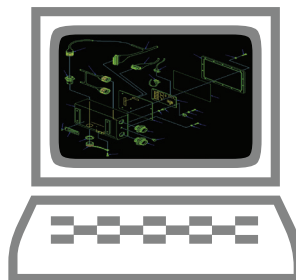

- Video Tracing
- Scanning to Raster
- Data Conversion to Vector Graphics

Text Conversion

- Scanning Paper to SGML/XML
- Electronic Documents to SGML/XML:
- Scanning to Native Formats (Word, Excel, etc)
- Scanning Paper to PDF

Convert Paper Drawings

Into AutoCad Drawings
